

THE FIRST POLYURETHANE-FREE MICRO-NATURAL CLOSURE WITHOUT CORK TAIN

- Micro-Natural is a new category of closures
- Made using cork granules bound into a bio-sourced and biodegradable material
- Polyurethane-free manufacturing process allows Sübr closures to be recycled into other applications
- Bottle to bottle consistency
- Traditional appearance of high quality
- Excellent ageing potential
- Guaranteed to avoid cork taint

	SÜBR M5	SÜBR F7
Oxygen Ingress per bottle	1.45 mg of O ₂ 1 st year 0.40 mg of O ₂ 2 nd year 0.25 mg of O ₂ per year from the 3 rd year onwards	
Sustainable development	Use of bio-sourced and biodegradable natural materials that can be recycled for other uses	
Releasable TCA	Guaranteed below the detection threshold of 0.5 ng/L	
Side & End print	Optional	
Cork feature print	Standard	Standard single-piece natural cork look & feel on side and ends
Diameter	24.3 ± 0.3 mm	
Length options	38/44/49 ± 0.5 mm ^a	44/49/52 ± 0.5 mm ^a
Chamfer	Standard 2 mm	Standard 0.5 mm
Extraction force	150 to 450 N ^b	

^a Other lengths upon request

^b Extraction force measured after 24 hrs at ambient temperature

A NEW CATEGORY OF MICRO-NATURAL CLOSURES

HIGH PERFORMANCE

The SÜBR is the world's first polyurethane-free and taint-free micro-natural closure. It offers a consistent, low oxygen ingress which is ideally suited for maintaining freshness and ensuring optimal cellar aging performance. State of the art technology makes it possible to produce the first polyurethane-free closure to ensure utmost respect for the environment.

GRAND DESIGN

The SÜBR provides the design of a natural cork closure, which will enhance the premium experience of opening a bottle of wine for wine lovers. It has a patented high-resolution cork feature print decoration on the side and ends. It is also possible to print a logo on its side and/or ends.

SUSTAINABLE DEVELOPMENT

The SÜBR closure has a truly innovative binder instead of commonly used polyurethane glue. Polyurethane-glue based products are not recyclable. The binder we selected is recyclable, biodegradable and is now made-up of 40% bio-sourced materials. The SÜBR is therefore easy to recycle mechanically for other uses. The SÜBR is ideal for wineries/retailers who strive to have their packaging fit a circular economy. It fully complies with all established food safety standards and regulations.
