# SÜBR BOTTLING & STORAGE GUIDELINES

## STORAGE

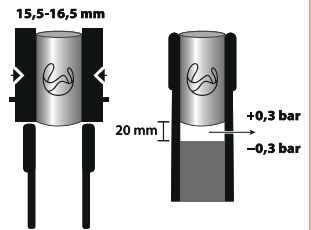

- Use within 6 months from production date
- Store in a dry and ventilated environment

## STORAGE

- Store in an odor free environment

## BOTTLING

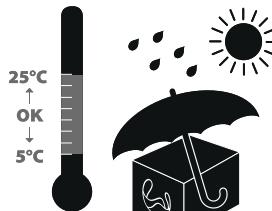

- Compression diameter: 15,5-16,5 mm
- Headspace pressure: 0,3 bar to +0,3 bar
- Headspace: 20 mm minimum

## PROCESSING

- Store closures one day before usage at 18-20°C / 64-68° F
- Bottle finish in compliance with EN 12726 or CE.T.I.E. GME 50.01 (non-standard finishes require a bottling trial)
- Corker must be in perfect working condition
- Corker jaws must be checked before and during use for damages
- Plunger must be centered
- Due to the high compressed head space under inner seals the use of a vacuum pump or flushing of the head space with CO<sub>2</sub> is recommended

## AFTER BOTTLING

- Store in a dry, ventilated and odor free environment
