## A NEW CATEGORY OF MICRO-NATURAL CLOSURES

### HIGH PERFORMANCE

The SÜBR is the world's first polyurethane-free and taint-free micro-natural closure. It offers a consistent, low oxygen ingress which is ideally suited for maintaining freshness and ensuring optimal cellar aging performance. State of the art technology makes it possible to produce the first polyurethane-free closure to ensure utmost respect for the environment.

### GRAND DESIGN

The SÜBR F5 provides the design of a natural cork closure, which will enhance the premium experience of opening a bottle of wine for wine lovers. It has a patented high-resolution cork feature print decoration on the side and ends. It is also possible to print a logo on its side and/or ends.

### SUSTAINABLE DEVELOPMENT

The SÜBR closure has a truly innovative binder instead of commonly used polyurethane glue. The binder we selected is recyclable, biodegradable and bio-sourced. The SÜBR is therefore easy to recycle mechanically for other uses. The SÜBR is ideal for wineries/retailers who strive to have their packaging fit a circular economy. It fully complies with all established food safety standards and regulations.
